New Fall-Fruiting Strawberry

AMERICUS

will produce luscious, ripe strawberries in

September and October This Year

*Luscious, Ripe, Perfect Berries of Large Size and Excellent Flavor
Equal to the Best June-Bearing Varieties*

A four-year test of this variety in competition with other Fall-fruited sorts
HAS PROVED IT TO BE

**THE BEST OF ALL FALL-FRUITING
STRAWBERRIES**

Very Productive

A crop averaging a pint of fruit per mother plant might reasonably be obtained in the Fall of the first year, provided the rainfall was normal or the plants were kept watered and well cultivated. *A heavier crop* is quite possible when conditions of soil fertility, soil moisture and culture are all favorable.

Ever-bearing

The tendency to bloom and bear fruit is so strongly developed in this variety that even the newly formed runners will bear fruit of fair size. The plants begin blooming soon after they are set out, and would bear fruit continuously until frost if left alone.

Points of Merit

"Americus" is a staminate or perfect flowering variety. The plants are heavily rooted, resist drouth, and make a number of runners which will also bear fruit. However, it is not advisable to allow more than two runners per mother plant to remain. The berries are of good size, perfect shape, and equal in flavor to the best June-bearing sorts.

To Get a Large Crop

of berries in the Fall, all blossoms should be removed up to as late as August 1. Ripe fruit may then be had about September 1 and until frost.

“AMERICUS”, The BEST Fall-Fruiting STRAWBERRY

Realizing its great value as a Fall-bearer, we have increased our stock as rapidly as possible and have potted up a fine lot of extra strong plants

Ready for Shipment On and After June 20

Pot-grown plants suffer no setback in transplanting and can be depended upon to bear a full crop of berries this Fall
We have so reduced the price that any one can afford to buy them, and offer

**Strong Pot-Grown Plants { per doz. \$1.50
per 100 \$10.00**

REMEMBER, EARLY PLANTINGS PRODUCE THE LARGEST CROP. ORDER NOW

To secure a heavy crop of berries in the Fall of the same year in which the plants are set out, it is necessary to do the setting out very early in order that at least a month and a half may be allowed for the plant to grow stocky and bushy.

The extensive trials made for several seasons past have convinced us that an excellent crop—indeed, a full crop—of large and luscious berries can be picked in September and October from plants set out from June 20 to July 20, and a fair crop from those set out later.

We are so enthusiastic over the merits of Americus that we say to everybody who has only a tiny garden patch to spare, give this extraordinary variety called Americus a trial—the actual results will astonish and delight you.

Last season we had a round number of strong pot plants ready for shipment on June 20, but

the demand for them far exceeded our expectations. This encouraged us to increase our stock as rapidly as was possible. As a result, we shall this season have thousands of the finest plants ready by June 20.

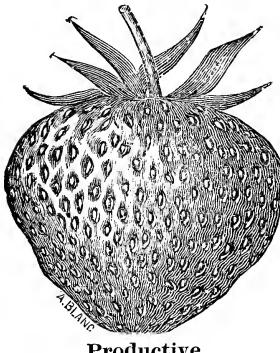

Get in line for the pick of this lot. Order very early, in fact, just as soon as you get hold of this catalog. This is not a request; it is just plain common-sense advice. We know when we have a good thing; our experience is of many years. We want you to share the good things. They are rare.

Read the cultural directions carefully. Remember to pick off all blossoms till at least August 1. If you do this you will be the proud owner of as fine a bed of ripe strawberries in September and October as can be had in June.

This sounds a little like a fairy story—does it not? But it is a fact. Try it.

OTHER FALL-FRUUITING SORTS

POT-GROWN PLANTS OF THE FOLLOWING VARIETIES WILL NOT BE READY FOR SHIPPING
BEFORE JULY 15

Productive

PRODUCTIVE

Plants medium sized, fruit medium and rather long, glossy red; quality sweet and good. Very productive. Price for pot-grown plants. Per Doz., \$1.50; per 100, \$10.00.

SUPERB

This variety is a strong, healthy grower and the plants are produced in great abundance. The individual plant is not so large as the Productive, but it makes many times more new plants. It roots deeply and endures the drouth well. To get the best results, it should be kept in hills to fruit well. If the runners are all allowed to grow the first year, there will be few berries. When kept in hills, the plants make large stools, and are very productive. The berries are very large, round and present a most pleasing appearance. It succeeds on all kinds of soils. Even if it is not considered as a Fall-bearing strawberry, it will pay to grow the Superb for the Spring crop. It is very large and productive in June, and what you get in the Fall is clear gain. The Superb succeeds best of any in the South. With many, the Superb is considered the most valuable variety. We think we have made it plain that it must be kept in hills with runners cut, if you want a large crop in the Fall. Pot-grown plants. Per Doz., \$1.50; per 100, \$10.00.

Special Hints for Success with Fall Strawberries

Make the soil rich by applying a heavy dressing of well-rotted stable manure. If convenient, supplement this by the application of chemicals supplying potash and phosphoric acid. For this purpose, sulphate or muriate of potash at the rate of 200 to 300 pounds per acre or 5 to 7 pounds per thousand square feet, and acid phosphate at the rate of 600 to 1,000 pounds per acre or 15 to 25 pounds per thousand square feet, would serve admirably; or instead of these chemicals, use any good fertilizer rich in potash and phosphoric acid, but containing little or no nitrogen. Work both manure and chemicals well into the soil. The Fall-bearing varieties produce a crop in one-third of the time required by the June-bearing kinds. It is therefore only fair to give them the benefit of extra fertility. It will pay well to do so.

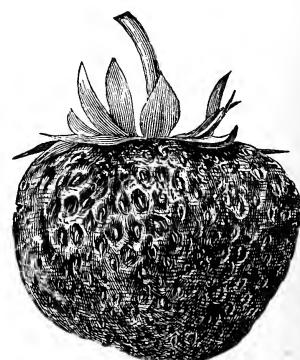

Fit the soil by very thorough plowing and harrowing, or spading and raking.
Set the plants as early as possible.

Grow the plants in hills, keeping all runners cut, or in hedgerows, allowing each mother plant to make one or two runner plants, and thereafter cutting all runners.

Do not let the plants bloom at all until August 1—keep the buds or, failing in this, the blossoms picked.

After picking the blossoms for the last time, apply straw or other litter as a mulch around the plants. This will save soil moisture, and keep the fruit clean.

If convenient, spray with lime-sulphur solution and arsenate of lead, or with Bordeaux mixture and arsenate of lead. Spraying should be done at intervals of a few weeks. It should be continued in the case of the fruiting bed until blossoms are picked for the last time. Get spraying directions from your state experiment station.

Superb

Pot-Grown Strawberry Plants

JUNE FRUITING

**Planted This Summer Will Bear a Full Crop Next Spring
Ready July 15**

You do not have to have a farm to grow strawberries. A small space in your own garden measuring only 10 feet by 25 feet is sufficient for setting out 100 plants.

With good cultivation you may expect from 40 to 50 quarts of berries the following Spring.

No other small fruit or vegetable will give such returns on so small a space as the strawberry. This makes it worth the while of anybody who has just a little piece of land to spare, to grow the varieties offered here.

The runners made by Strawberry Plants during the latter part of June, July and August are planted in small pots and are allowed to root thoroughly. Remaining attached to the Mother Plant they make a good, steady growth of leaves.

When thoroughly rooted they are cut off the Mother Plants and are then ready to be shipped for planting. If set out during July and August a plant of this kind will bear a full crop of berries the following Spring.

It is not at all disturbed in its growth by transplanting on account of its ball of soil clinging firmly to the roots, but will, in consequence, grow right ahead as though never disturbed.

It is, therefore, of great advantage to set out pot-grown plants, as they will bear a crop a year earlier than runners. The ground laid out for the

Strawberry bed could be used during the months of April, May and June to raise another crop, such as peas, spinach, turnips and the like.

In the culture of the Strawberry it is essential to keep all runners, which are bound to form after the plants are set out, pinched off. The plants must be gone over positively once a week in order to save all the strength the roots can give to build up the Mother Plant.

The ground, of course, should have been enriched with a liberal supply of well-rotted barnyard manure, spaded in thoroughly before planting. An occasional application of bone meal or phosphoric acid is of great benefit, as it helps to produce blossoms and fruit. Manures containing too high a percentage of nitrogen should be avoided.

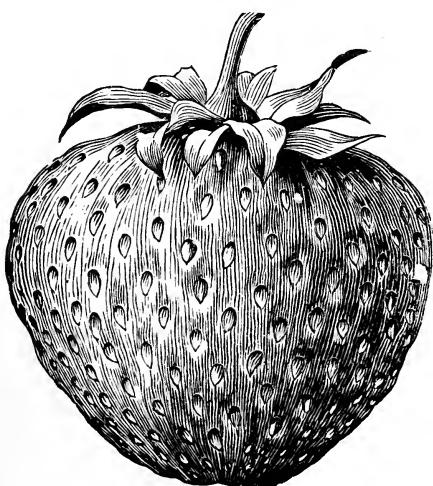

Pot-grown strawberry plants can be set out any time from July 15 to September 25 and

they will bear a full crop of berries next Spring. However, it is preferable to plant in July and August, as the plants will have a chance to grow larger before Winter and a heavier crop of fruit is assured.

After the plants stop bearing remove the salt hay, pinch off all runners again and cultivate thoroughly. Treated in this way a bed will last from four to five years.

A Pot-grown Strawberry Plant
ready for setting out

Chesapeake

Chesapeake

**The Leading Variety for June Bearing
There is No Better**

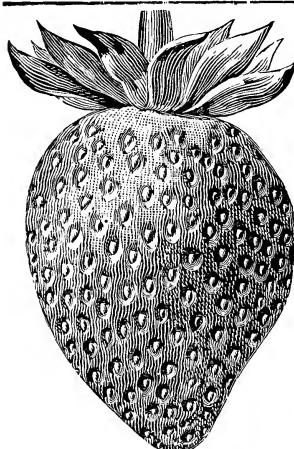

CHESAPEAKE embodies all the best qualities desired in a strawberry. The plants are healthy and strong, the blossoms perfect and set freely. The fruit is very large, of delicious flavor and an excellent keeper—therefore, a capital shipper. The fruit of the Chesapeake is borne on large stems, the greater portion of which stand upright, holding the fruit from the ground. Every blossom makes a berry. The result is a good crop of berries that are well developed and strictly fancy. Altogether this variety is the most desirable both for the home garden and for those who supply the market.

60c. per doz.; \$4 per 100.

Excelsior, Marshall, Commonwealth

For a continuous crop, plant these three varieties. They will fruit in the order named.

People who have a home garden should by all means choose these three varieties, to give them the desired results, namely, berries for a long and unbroken period.

Excelsior [Ripens First]

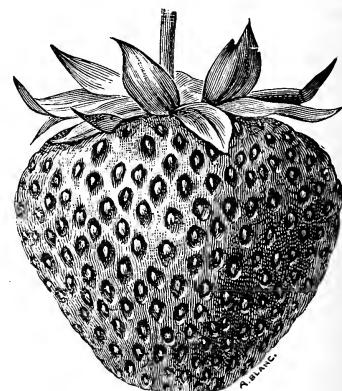

Excelsior

Extra early. Perfect flowering. This is the *largest* of all the extra early berries, which generally run small. Ripe fruit may be gathered as early as June 1. For so early a variety it is extraordinarily productive; it outyields other standard early sorts in the proportion of two to one. The fruit is large, very handsome, and firm.

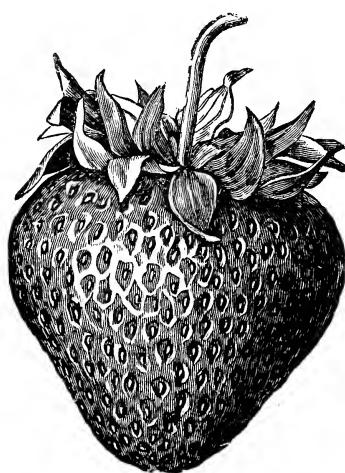

50c per doz.
\$3.50 per 100

Marshall

is the *sweetest* of all mid-season berries as it is the most luscious. It is especially desirable for its large size and rarely fine flavor. When full ripe this berry is dark crimson and strikingly handsome. Its wonderful quality, fine flavor and large size make it admirable for table use.

Marshall [Ripens Second]

Commonwealth [Ripens Third]

Commonwealth

is by all odds the *best* and *largest* of the very late berries. Its excellence lies not only in size, but also in flavor.

50c per doz.; \$3.50 per 100

Pot-Grown Strawberry Plants

Continued

AUGUST LUTHER. (Perfect.) This extra early berry succeeds everywhere. The flesh is dark red, very firm and excellent flavor. A valuable shipping variety. 60c. per Doz.; \$4.00 per 100.

BARRYMORE. (Perfect.) A high class mid-season variety, producing fruit of the very finest flavor. Very large, glossy and attractive. 60c. per Doz.; \$4.00 per 100.

BEDER WOOD. (Perfect.) This is one of the very best early berries. The fruit is large, conical, bright red color and of excellent quality. 50c. per Doz.; \$3.50 per 100.

BRANDYWINE. (Perfect.) The berries are large roundish-conical, regular and uniform, bright glossy crimson, very handsome, firm and solid, excellent in quality, with fine aromatic flavor. Plant remarkably vigorous and productive. Mid-season to late. 50c. per Doz.; \$3.50 per 100.

BUBACH. (Mid-Season Pistillate.) The most popular of all large strawberries. It is a wonder in its season of fruit, completely covering the ground about the plant with large berries. The berries are roundish, slightly flattened, color, orange scarlet. 50c. per Doz.; \$3.50 per 100.

CARDINAL. (Pistillate.) This magnificent "long season" strawberry is adapted to all purposes, all soils, and all methods of culture. The berries are medium to large in size, nearly round, and are exceptionally beautiful in appearance; colored brilliant bright red. Ripening uniformly with no green nor white tips. 60c. per Doz.; \$4.00 per 100.

CLIMAX. (Perfect.) (Extra early.) Of a large size and uniform in shape. Splendid bright color and excellent flavor. Foliage a beautiful light green, plants very strong and hardy. A very productive bearer, having a good record as being a very profitable bearer for general planting. 60c. per Doz.; \$4.00 per 100.

CLYDE. (Perfect.) Is as large as Bubach, nearly or quite a week earlier and very much firmer. It is a strong staminate. The plant is very vigorous and healthy. Season early. 60c. per Doz.; \$4.00 per 100.

CHIPMAN. (Perfect.) One of the best mid-season berries of recent introduction. The plant is of strong upright growth with large healthy foliage. The glossy red fruit is medium in size, very prolific and an ideal variety for home consumption. 60c. per Doz.; \$4.00 per 100.

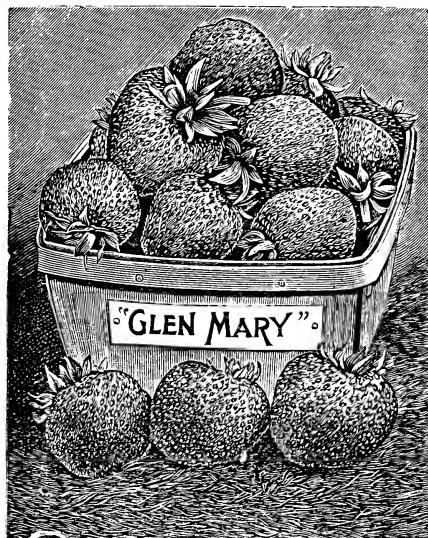

EARLY OZARK. (Perfect.) This new extra early variety ripens its crop and is out of the way before mid-season kinds come in. The fruit is dark crimson in color, very large, and does not get small towards the end of the season. An exceedingly prolific variety. 60c. per Doz.; \$4.00 per 100.

FENDALL. (Perfect.) The berries are perfect beauties, rich red in color, smooth and glossy, with long stems and large showy raps. The

merits of the Fendall are great vigor of plant, splendid root system, wonderful productiveness, large size of fruit, fine flavor and length of bearing season. Berries picked from June 2d to July 10th is its record. 75c. per Doz.; \$5.00 per 100.

GANDY. (Perfect.) One of the best late strawberries. In size and firmness it is all that can be desired. The berries are large, very uniform in size and shape, of bright crimson color, handsome and showy, very firm and of good quality. 50c. per Doz.; \$3.50 per 100.

GLEN MARY. (Perfect.) (Mid-Season.) A superb variety, which unites large size, great productiveness and good quality; bright glossy crimson, and fine in flavor. The plant is strong and healthy, very prolific. 50c. per Doz.; \$3.50 per 100.

JESSIE. (Perfect.) Similar to the McKinley, bearing about two weeks earlier than that variety. Berries large, of a bright red color, very productive, flavor delicious. Fruit holds its size until end of the season. 60c. per Doz.; \$4.00 per 100.

MCKINLEY. (Perfect.) The fruit is large, roundish, inclining to conical, but sometimes flattened or coxcombed; color crimson, flesh firm and quality very good. The plant is vigorous, healthy and a great yielder. Season medium to late. We can confidently recommend it for garden or market culture. 50c. per Doz.; \$3.50 per 100.

NEW YORK. (Perfect.) As fruited here, the berries are large to very large; season of ripening, medium; color, dark scarlet, changing to crimson, when fully ripe; colors all over at once, no green sides or green tips. The quality is good. In growth of plant it is very large and stalky. 60c. per Doz.; \$4.00 per 100.

Pot-Grown Strawberry Plants

Continued

NICK OHMER. (Perfect.) The plant is a good grower, of large size, free from rust, makes a good number of plants and bears very heavy crops. The fruit is very large, dark glossy red, firm, of good quality. It has a long season extending from early medium to late. It is especially adapted to hill culture. 50c. per Doz.; \$3.50 per 100.

OOM PAUL. (Perfect.) This is one of the largest berries ever introduced. It is a large, thrifty, open growing plant with glossy dark green foliage. It is of fine color and of extra good quality, and is one of the most valuable for home or commercial purposes. 60c. per Doz.; \$4.00 per 100.

PRESIDENT. (Pistillate.) Fancy berry. Uniform large size, covering a long season of fruit. Very valuable. 60c. per Doz.; \$4.00 per 100.

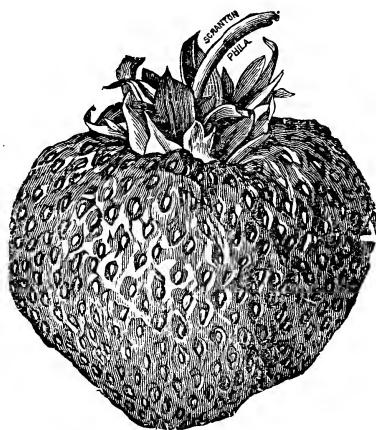

ROYAL SOVEREIGN. The fruit is of the largest size and conical shape; color is a bright, glossy scarlet; flesh white and firm. The plants are strong growers and produce large crops of berries. Unequaled for early forcing. 75c. per Doz.; \$5.00 per 100.

SAMPLE. (Pistillate.) Plants strong and vigorous, very productive, medium to large berry. (Mid-season to late.) 60c. per Doz.; \$4.00 per 100.

SENATOR DUNLAP. A most prolific variety, fruit of medium size, dark red and very juicy. (Early to mid-season.) 50c. per Doz.; \$3.50 per 100.

SCHOFIELD. An especially fine berry of enormous size, extra broad and thick; of a bright red color and rich, aromatic flavor. 50c. per Doz.; \$3.50 per 100.

SHARPLESS. (Perfect.) Berries large to very large, somewhat irregular in shape, crimson, moderately firm and of good quality. Mid-season. 50c. per Doz.; \$3.50 per 100.

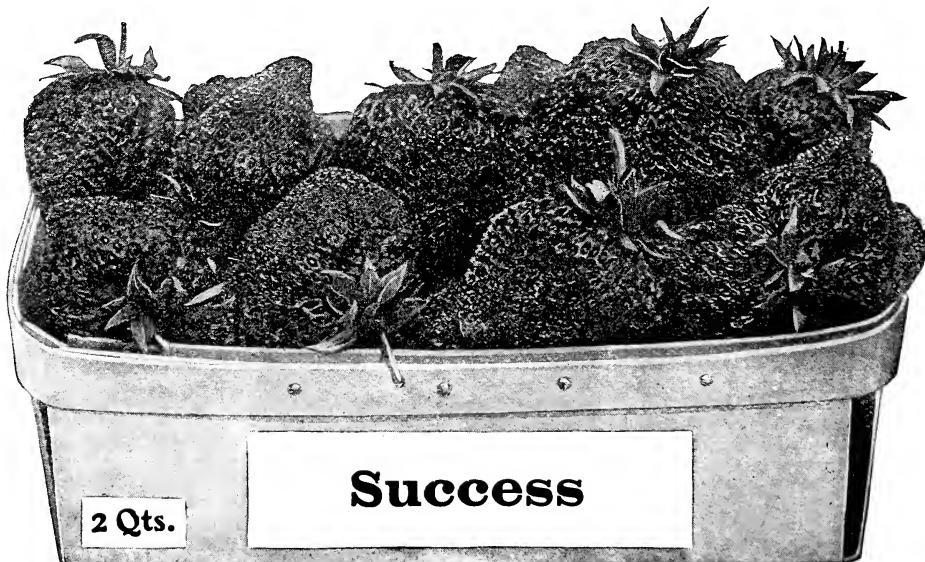

Sharpless

STEVENS LATE CHAMPION. (Perfect.) This late variety is remarkable for its heavy cropping qualities, and does well on light sandy soil. The berries are large, perfect in form, color bright crimson. 60c. per Doz.; \$4.00 per 100.

SUCCESS. (Perfect.) This new strawberry is the earliest large variety we know of. The berries are globular in form, slightly conical and of a bright scarlet color. The flavor is mild, sweet and rich, a vigorous grower and very productive. 60c. per Doz.; \$4.00 per 100.

SILVER COIN. This mid-season variety is believed to excel all others of its season in uniting desirable properties. The berries are large, uniform in size and shape and very productive. 75c. per Doz.; \$5.00 per 100.

Pot-Grown Strawberry Plants--Continued

THE HUNN. (Pistillate.)

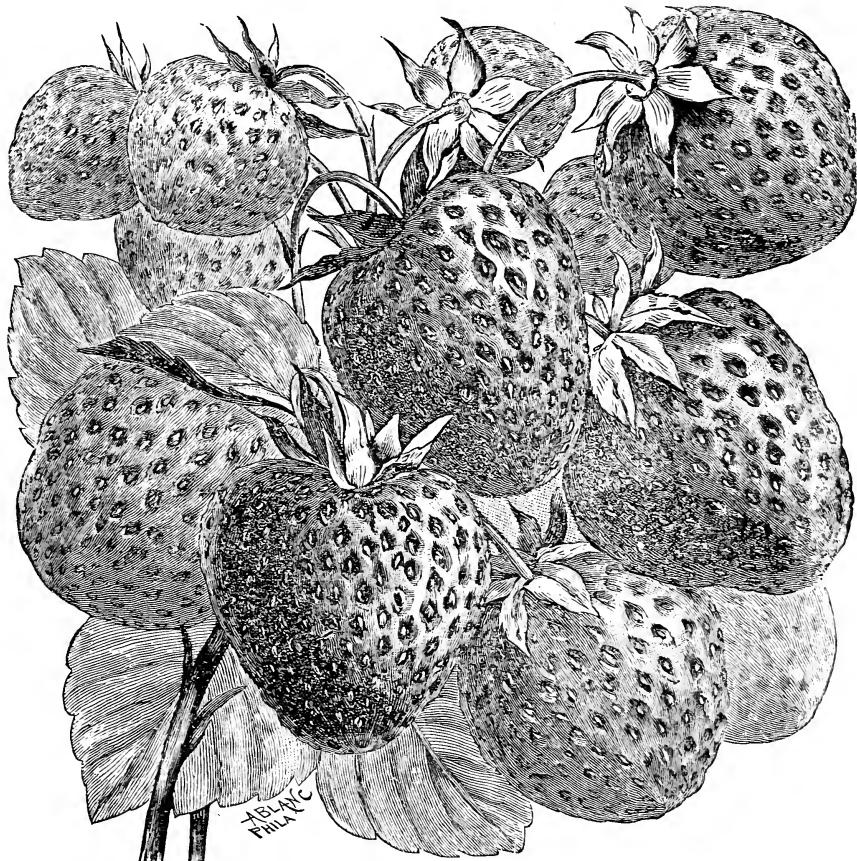

This extra late berry is round, handsome and uniform in shape. The flesh is very firm, color dark crimson. The berries are extra large, of excellent flavor and deeply colored. It is of strong, vigorous growth, very prolific and can be recommended as a valuable late variety. 50c. per Doz.; \$3.50 per 100.

UNCLE JIM. (Perfect.)

Wonderfully productive, very uniform in shape, of a bright red color, and fine quality. The fruit stalks are exceedingly stout; but when borne down the berries do not rot on the underside, before they are ripe enough to pick. 60c. per Doz.; \$4.00 per 100.

WM. BELT. (Perfect.)

The berries are as large as Bubach, more perfect in shape, just as productive and the color is perfect. (Mid-season.) 50c. per Doz.; \$3.50 per 100.

VEGETABLE PLANTS READY JULY 1

CELERY

Strong plants of the undenoted variety 15c. per Doz.; 50c. per 100; \$4.00 per 1,000.

Golden Self-Blanching. (True French Strain.) It is of a rich golden-yellow color, crisp, tender and of fine flavor. Keeps well throughout the season, and is the earliest variety grown.

White Plume. A valuable early variety; requires very little labor in blanching; one of the best for early use.

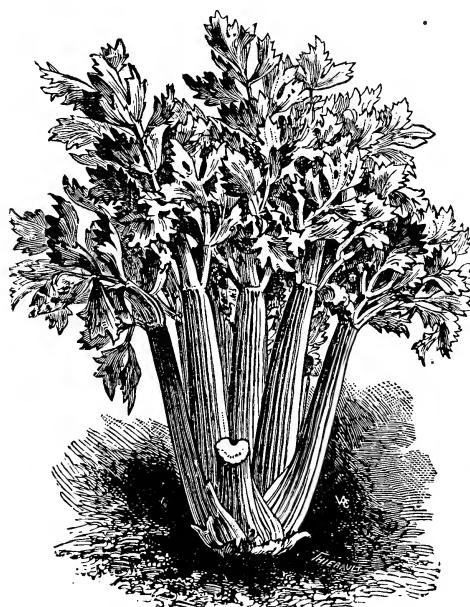

Winter Queen. Is a compact grower, stalks thick, solid and crisp, and when blanched is a creamy white color.

Perfection Heartwell. It is of medium height, it blanches well up in the leaves and its crisp tenderness and delicious flavor are unequalled.

Boston Market. Of dwarf-branching habit, solid, crisp and fine flavor.

Giant Pascal. The stalks are thick, solid and crisp; golden-yellow heart.

Golden Dwarf, or Golden Heart. A distinct variety. When blanched the heart develops a beautiful golden yellow. Crisp, solid, fine flavor.

Golden Self-Blanching

CELERIAC (Turnip Rooted Celery)

20c. per Doz.; 60c. per 100; \$5.00 per 1,000.

A variety of Celery with Turnip-shaped roots which are white-fleshed, comparatively tender, and have the flavor of Celery stalks.

Apple-Shaped. A variety with small foliage and tubers almost round in shape.

Large Erfurt. A standard variety, producing Turnip-shaped roots.

Large Smooth Prague. The finest variety yet introduced.

CABBAGE

15c. per Doz.; 50c. per 100; \$4.00 per 1,000.

Succession. The Succession is about one week later than the Early Summer, but is double the size, handsome, large and a sure header.

Premium Late Flat Dutch. A popular late variety; its keeping qualities are unsurpassed. For market and family use this variety is more extensively cultivated than any other.

Autumn King. One of the finest strains of late Cabbage ever offered. It produces regular, even heads of enormous size; a magnificent cropper.

W. & D.'s Main Crop Cabbage. We believe this to be one of the finest main crop Cabbages ever offered. The heads are about uniform in size and shape, weighing from 12 to 15 pounds each, and as round as a ball. Unlike most varieties, the heads are perfectly solid, and the stem does not run up into the head. The flesh is exceedingly firm, tender and white, and matures fully two weeks earlier than any of our late growing kinds.

Holland, or Danish Ballhead. A vigorous grower, of compact growth; is exceedingly hardy, and in quality it is one of the best, being very white, crisp and tender.

Large Red Drumhead. A great improvement on the Red Dutch, being earlier, larger and a better header; heads round, solid, and deep blood-red in color.

Perfection Drumhead Savoy. This selection is certainly the finest we have seen, and largely grown on Long Island for the New York market.

CAULIFLOWER

20c. per Doz.; \$1.00 per 100.

Early Snowball. One of the best for general use; medium size, but sure to head.

Dry Weather. Adapted for growing in dry locations.

ENDIVE

15c. per Doz.; 60c. per 100.

Green Curled. The hardiest variety grown; beautifully curled.

Broad-Leaved Batavian (Escarolle).

BRUSSELS SPROUTS

15c. per Doz.; 50c. per 100; \$4.00 per 1,000.

Long Island Improved. The finest variety grown; of vigorous growth, and producing handsome, solid, round sprouts of the best quality.

BORECOLE, or KALE

15c. per Doz.; 50c. per 100; \$4.00 per 1,000.

Dwarf Green Curled Scotch. Very hardy, and improved by a moderate frost.

W. & D.'S SURE CROP MUSHROOM SPAWN

English Spawn. (In bricks.) The finest quality, per lb 15c.; 8 lb \$1.00; 100 lb \$12.00.
Pure Culture Spawn. (In bricks.) The finest quality, per lb 20c.; 7 lb \$1.00; 100 lb \$13.00.
Virgin Mushroom Spawn. Tablets, 15c. each; \$1.50 per Doz.; \$10.00 per 100.

W. & D.'s Sure Crop Mushrooms

W. & D.'S FARM SEEDS

(For Summer Sowing.)

Alfalfa. Very valuable, not only as a forage crop, but as a soil enricher. If sown broadcast, sow 30 to 40 lb per acre; if drilled in, sow 25 to 30 lb per acre. Per lb 30c.; per 100 lb \$25.00.

Crimson or Scarlet Clover. Excellent for a cover crop in orchard, or for plowing under to improve poor soils. Sow at the rate of 20 lb per acre. Per lb 15c.; per 100 lb \$12.00.

Hungarian Millet. The quickest catch crop for hay, may be sown any time through the Summer up to

the middle of August. Sow one bushel per acre. Per bushel (48 lb) \$2.50.

Japanese Millet. A distinct variety, grows tall and produces an enormous crop. Is much relished by all kinds of stock, whether green or cured. Sow at the rate of 15 lb per acre. Per lb 10c.; per 100 lb \$8.00.

Dwarf Essex Rape. Provides a perfect pasture and is relished by all kinds of stock. Sow 10 lb per acre broadcast and 5 lb per acre in drills. Per lb 12c.; per 100 lb \$10.00.

W. & D.'s Evergreen Lawn Grass

To make a good lawn, good seed is absolutely essential

We have made many experiments in order to ascertain just what is the best mixture for Permanent Lawns and the grasses which are best suited to this climate. W. & D.'s Evergreen Lawn Grass is composed of a combination of various fine-leaved, deep-rooting perennial grasses, carefully blended, and thoroughly mixed so that the results from its sowing is a uniform growth of rich green grass, growing at different seasons of the year, so that a deep green velvety sward is maintained from early Spring until late in the Fall.

The ingredients of this mixture are the highest grade of re-cleaned seeds only, free from chaff and weeds, and careful experiments have convinced us that W. & D.'s Evergreen Lawn Grass will give most satisfactory results.

One pound of this mixture will sow 400 square feet, one hundred pounds will sow one acre.

Weight per measured bushel, 25 lb.

PRICE—Per lb, 35c.; per 10 lb, \$3.00; per 25 lb, \$7.00; per 100 lb, \$25.00.

W. & D.'s Central Park Lawn Grass

This popular mixture produces beautiful and permanent lawns. It is composed of dwarf, re-cleaned, evergreen grasses which are adapted for the purpose of producing turf which retains its rich green appearance throughout the entire Summer and Fall.

We recommend sowing four bushels of this mixture to the acre. Weight per bushel, 20 lb.

One quart will sow 15x20 ft. (300 sq. ft.), one bushel 100x108 ft. (10,800 sq. ft.), four bushels one acre (43,560 sq. ft.).

PRICE—Per quart, 25c.; per peck, \$1.50; per bushel, (20 lb), \$5.00.

Hardy Perennial Flower Seeds

The perpetual charm of hardy gardens has won for them wide and intense enthusiasm. While natural and restful in general effect their beauty is yet ever varying and ever appealing, for flowers may be found in them throughout the season. Perennials are quite easily raised from seed and can be sown as late as September. A light sandy loam is most suitable. Seed beds should be shaded from the hot sun, and be kept moist. When the plants are large enough to handle they may be transplanted to a permanent place. A little protection for nearly all the hardy plants in Winter is very helpful; for while they survive the severest frosts, they are frequently killed by alternate freezing and thawing in early Spring. Hay, leaves or straw furnish excellent material for covering.

	Pkt.
ABOBRA viridiflora. Very pretty climbing plant; bears bright scarlet fruits	\$0.10
ACANTHUS mollis (Bear's Breech). 2 ft. White10
ACHILLEA ptarmica fl. pl. ("The Pearl"). 2 ft. Double white flowers; fine for cutting10 $\frac{1}{8}$ Oz. 75c.

PRIMULA Kewensis. Bright yellow and fragrant blooms produced in whorls along the entire length of the stem50
Forbesii (Baby Primrose). Produces delicate sprays of small lavender-colored flowers20

Weeber & Don's Extra Selected Bulbs for Early Forcing

LILIUM HARRISII

Bermuda Easter Lily

(Ready in July)

This Lily is at present the favorite variety with both the proficient and the amateur. Flowering at Easter makes its long white tubular flowers of extreme fragrance all the more welcome. For table or church decoration, no plant is more useful, and it remains after cutting in perfect condition for a long time. Without doubt, the Bermuda Easter Lily is now the most popular white flowering plant.

Extra Size Bulbs. 7 to 9 in. Each 30c., Doz. \$2.00, 100 \$14.00.

Mammoth Size Bulbs. 9 to 11 in. Each 35c., Doz. \$4.00, 100 \$30.00.

W. & D.'s LARGE-FLOWERING SCHIZANTHUS

(Greatly Improved Strains for Pot Culture and Exhibition)

Bulbs for Early Forcing—Continued

LILIUM CANDIDUM

Annunciation, Madonna or St. Joseph Lily

The well-known Garden Lily; snow white, fragrant blossoms; grows from 3 to 4 ft. high. Blooms in June in the open ground; is also a good forcing for greenhouse work. A shady nook in the garden is made exceedingly bright by its presence. Quite hardy, needing no protection from frost.

Monster Size Bulbs. Each 20c., Doz. \$2.00, 100 \$15.00.

FRENCH ROMAN HYACINTHS

(Ready for Delivery in August)

(Very short crop)	Doz.	100	1000
Early Pure White, Jumbo Bulbs. 15 ctm. and over.	\$1.00	\$7.50	
Early Pure White, monster size, 14 ctm. and over90	6.50	\$60.00
Early Pure White, extra selected, 13 to 15 ctm.70	5.50	50.00
Single Dark Rose40	3.50	30.00
Single Light Blue40	3.50	30.00
Double Rose Pink40	3.50	30.00

POLYANTHUS NARCISSUS

Paper White Grandiflora Multiflora. A great improvement on grandiflora, vigorous grower with fine spike which carries large trusses, and in greater abundance than the old variety. Doz. 40c., 100 \$2.50, 1000 \$20.00.

Paper White Grandiflora. Beautiful clusters of pure white flowers. **Mammoth Bulbs.** 14 ctm. and over. Doz. 30c., 100 \$2.25, 1000 \$20.00.

NARCISSUS TRUMPET MAJOR

(French)

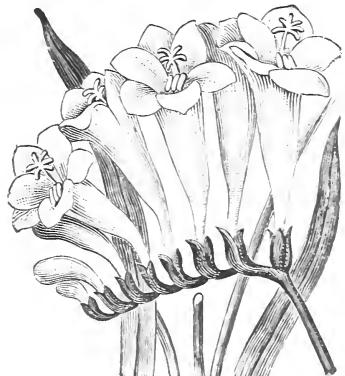

Grown in the south of France, these bulbs ripen much earlier than those grown in Holland, and are therefore of great value for early forcing. They can be had in bloom fully a month ahead of the Dutch-grown stock. The flowers are large, trumpet and perianth deep golden yellow. Doz. 35c., 100 \$2.25, 1000 \$20.00.

FREESIA

Very popular and greatly prized for the delightful fragrance of their delicately colored flowers, which are splendid for cutting. They last a long time in water.

Purity. Magnificent pure white flowers of large size, borne on long stiff stems, one truss bearing from 8 to 10 blooms.

Mammoth Bulbs.	Doz. 35c., 100	\$2.50, 1000 \$22.00.
Extra Large Bulbs.	Doz. 30c., 100	\$2.00, 1000 \$18.00.
Refracta alba.	Pure white with yellow blotch.	
Monster Size Bulbs.	Doz. 30c., 100	\$1.75, 1000 \$15.00.
Extra Large Bulbs.	Doz. 20c., 100	\$1.50, 1000 \$12.00.

Freesia Refracta Alba

A NEW FOUR-LEAF CLOVER

Oxalis Repens Atropurpurea

A remarkably pretty plant of rapid growth, producing numerous four petalled leaves of a rich deep green color with a purple zone around the center, and pink blossoms. Introduced about two years ago, this plant has attracted the widest attention and is greatly admired by all who have seen it; in fact, it is today the latest and most fashionable mascot of society. Every gardener should grow a few. Just the thing for a gift to the sick friend or the traveler. It will thrive well in the house and is a glorified addition of our time honored charm, the Four-Leaf Clover. **Bulbs.** 10c. each. 75c. Doz. \$3.50 per 100. **Plants** from 2½-in. pots, 50c. each. \$5.00 Doz. \$35.00 per 100.

Bulbs. Ready for delivery from January 1st to June 15th. Orders booked now.

Plants. Ready July 1st.

OXALIS, Bermuda Buttercup

Beautiful large, clear yellow flowers. Doz. 30c., 100 \$2.00.

COLD STORAGE LILY OF THE VALLEY PIPS

W. & D.'s Extra Selected, Strong Berlin Pips
(Can be supplied at any time of the Year.)

Every Fall we place a large quantity of our Famous Berlin Pips in cold storage, where they are frozen and kept perfectly dormant until wanted for planting. They will bloom in 21 days. Require no forcing and produce perfect foliage.

Case 250 Pips	\$ 8.00
Case 500 Pips	14.00
Case 1000 Pips	25.00

Orders booked for immediate and future deliveries.

INSECTICIDES AND SPRAYERS

"APHINE"

A powerful insecticide, but does not affect the most tender growths. Mix one part Aphine to forty parts water for use. Price, $\frac{1}{4}$ pt. 25c., $\frac{1}{2}$ pt. 40c., pt. 65c., qt. \$1.00, gal. \$2.50.

ARSENATE OF LEAD

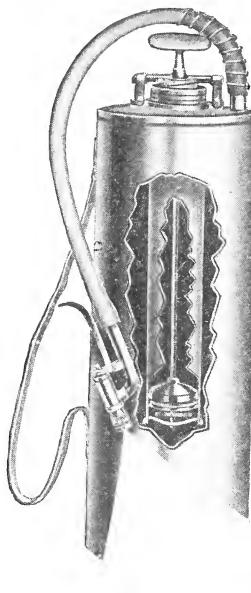

Popular remedy for use against all eating insects that attack foliage and fruit trees. Use two or three pounds to fifty gallons water. 1 lb 25c., 5 lb \$1.00, 10 lb \$1.80, 25 lb \$3.75, 50 lb \$6.50, 100 lb \$12.00.

PYROX (Bowker's)

Kills all leaf-eating insects and prevents blights and fungous troubles, without injury to fruit or foliage. Sticks like paint, and rain won't wash it off. 1 lb 25c., 5 lb \$1.00, 10 lb \$1.75, 25 lb \$4.00, 100 lb \$13.50.

TREE TANGLEFOOT

A perfect safeguard for trees and shrubs against Gypsy and Brown-tail Moths and other creeping insects. Price, 1 lb 30c., 3 lb 85c., 10 lb \$2.65, 20 lb \$4.80.

Auto-Sprayer

READEANA

(Rose Bug Exterminator)

Destroys Rose Bugs, Black Ants, etc., without injury to plants. Mix one part with three parts water and apply with brush or sprayer. In bottles, 50c., \$1.00 and \$2.00; gal. \$4.00.

WEED KILLER

("Read's Herbicide")

This is the most effectual weed killer known. In quart jugs sufficient to make 5 gallons of liquid. Price, 50c. In half-gallon jugs, sufficient to make 10 gallons of liquid. Price, 80c. In one-gallon kegs, sufficient to make 20 gallons of liquid. Price, \$1.50. In five-gallon kegs, sufficient to make 100 gallons of liquid. Price, \$5.50, 10 gals. \$10.00.

WORM ERADICATOR

(Read's Electric)

The best preparation for destroying worms of all kinds infesting Lawns, Golf Grounds, Greenhouses, etc. One gallon diluted with water makes 150 gallons for use. In bottles 50c., \$1.00 and \$2.00 each; gal. \$4.00.
